

QWidget

```
classDiagram
    class QWidget {
    }
    class page_vide {
    }
    QWidget <|-- page_vide
```

The diagram illustrates a class hierarchy. At the top is the 'QWidget' class, represented by a rectangle with three horizontal compartments. The top compartment contains the text 'QWidget', while the other two are empty. Below it is the 'page_vide' class, represented by a shaded rectangle with three horizontal compartments. The top compartment contains 'page_vide', the middle one is empty, and the bottom one contains '+ page_vide()'. A blue arrow with an open triangular head points from the top of the 'page_vide' class to the bottom of the 'QWidget' class, indicating that 'page_vide' inherits from 'QWidget'.

page_vide

+ page_vide()
